

NIVEAU MATHS

6ème

Figures usuelles et aires

Aire du carré, rectangle et triangle

Facile

Moyen

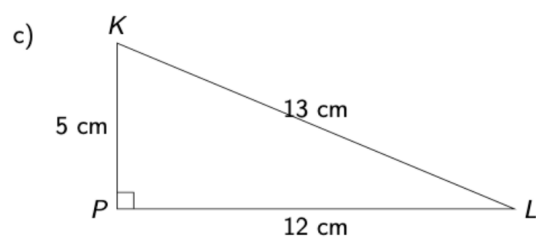

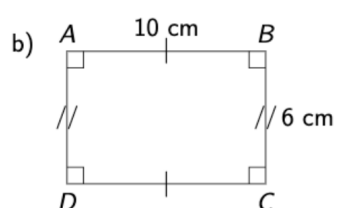

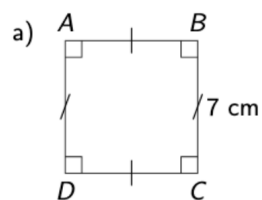

Difficile

Exercices Faciles

Pour s'échauffer et bien démarrer.

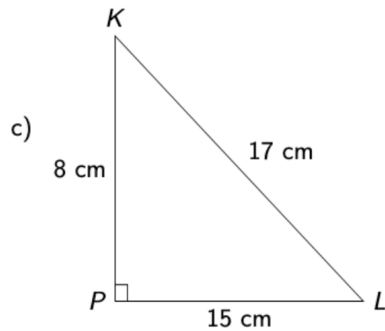

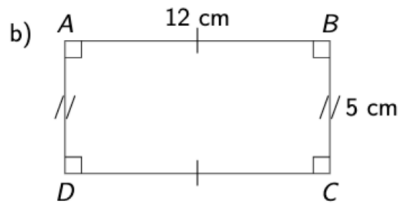

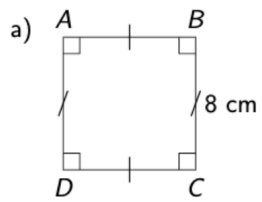

EXERCICE 1

Calculer l'aire des figures suivantes :

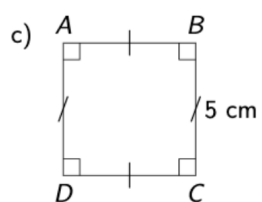

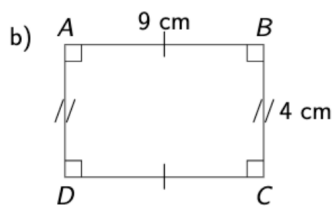

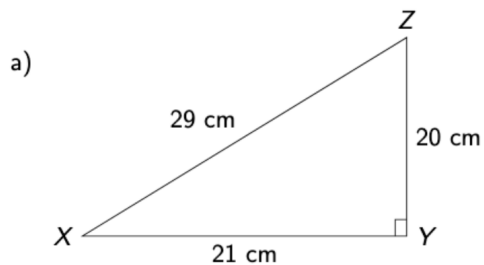

EXERCICE 2

Calculer l'aire des figures suivantes :

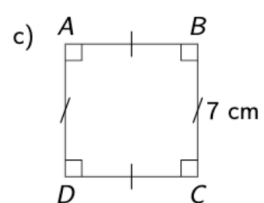

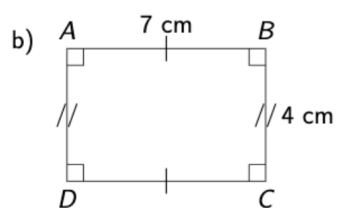

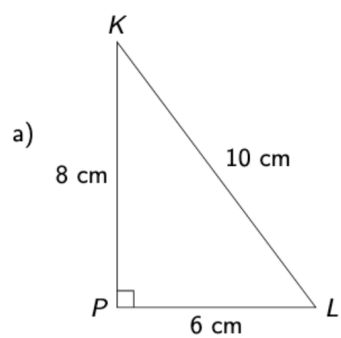

EXERCICE 3

Calculer l'aire des figures suivantes :

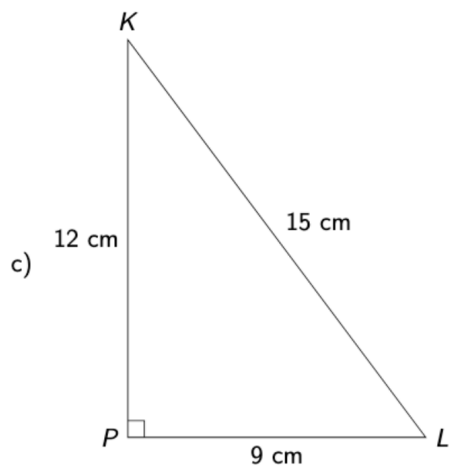

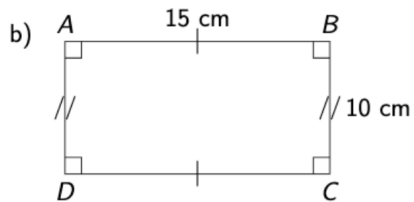

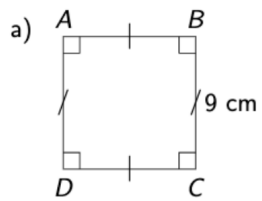

EXERCICE 4

Calculer l'aire des figures suivantes :

EXERCICE 5

Calculer l'aire des figures suivantes :

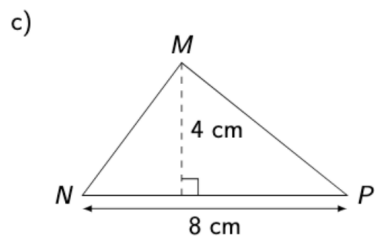

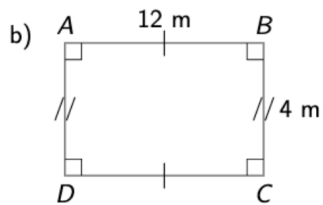

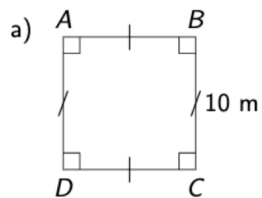

d) Un triangle rectangle a une aire de 24 cm^2 . Sa base mesure 6 cm. Quelle est la longueur de sa hauteur ?

Exercices Moyens

Pour bien comprendre et appliquer la méthode.

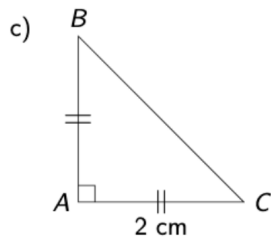

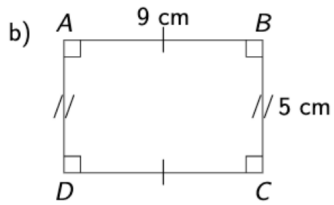

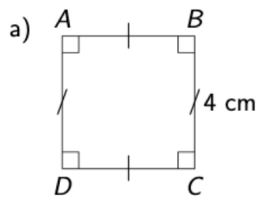

EXERCICE 1

Calculer l'aire des figures suivantes :

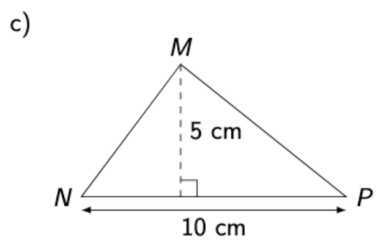

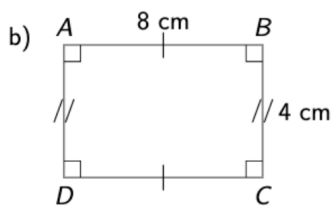

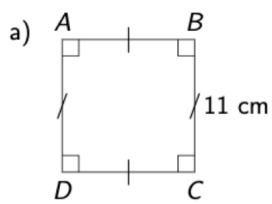

EXERCICE 2

Calculer l'aire des figures suivantes :

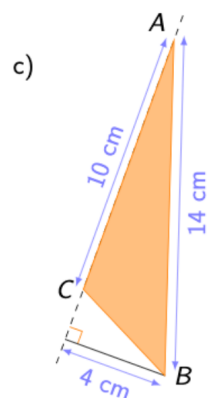

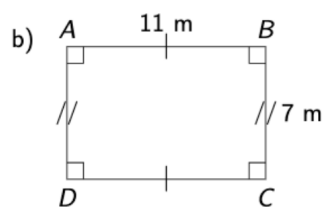

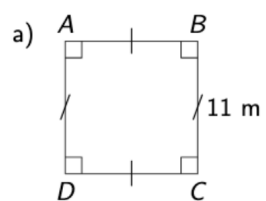

EXERCICE 3

Calculer l'aire des figures suivantes :

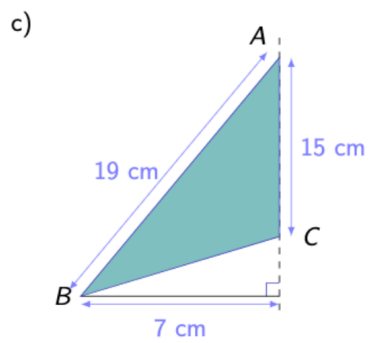

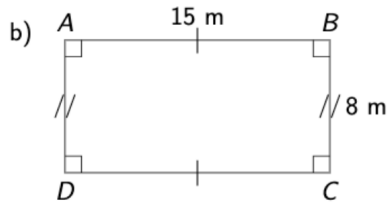

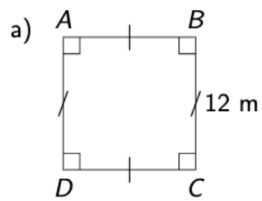

EXERCICE 4

Calculer l'aire des figures suivantes :

EXERCICE 5

Calculer l'aire des figures suivantes :

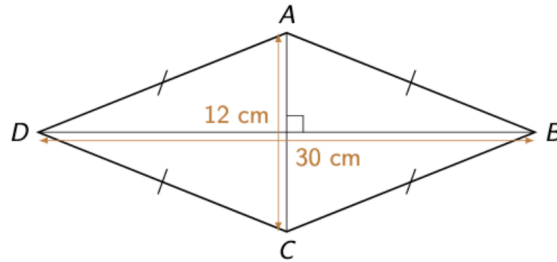

d) Un triangle rectangle a une aire de 36 cm^2 . Sa base mesure 8 cm. Quelle est la longueur de sa hauteur ?

Exercices Difficiles

Pour aller plus loin et te dépasser.

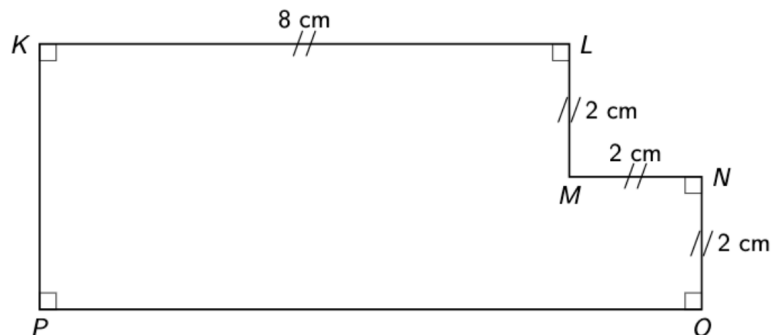

EXERCICE 1

Calculer l'aire de ce losange.

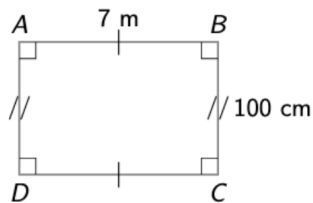

EXERCICE 2

Calculer l'aire de la figure suivante.

EXERCICE 3

Calculer l'aire de la figure suivante :

EXERCICE 4

L'aire d'un rectangle vaut 40 cm^2 et sa largeur vaut 5 cm. Combien vaut la longueur de ce rectangle ?

EXERCICE 5

L'aire d'un carré vaut 36cm^2 , que vaut son côté ?
