

Les angles

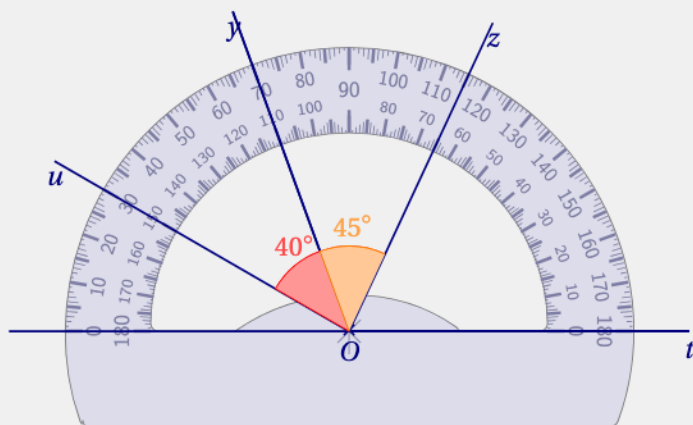

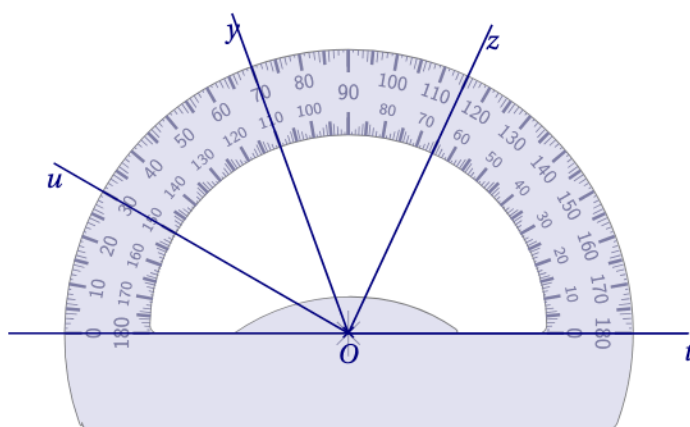

Mesurer un angle

À toi de maîtriser !

EXERCICE 1

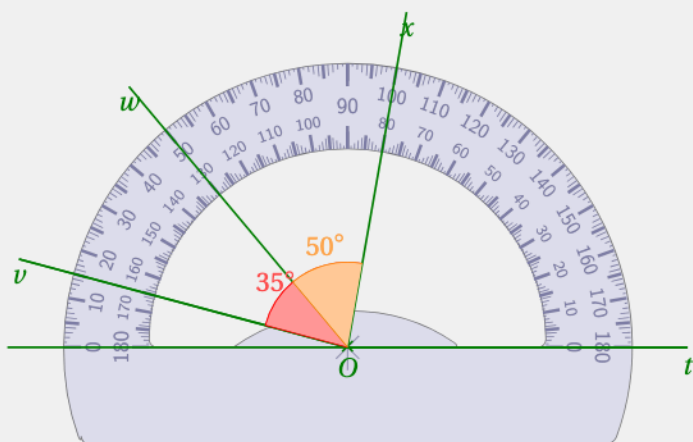

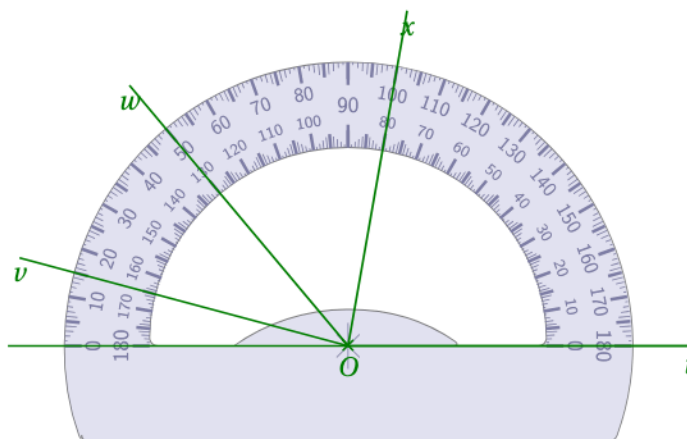

Calculer les angles $\widehat{zOy}$ et $\widehat{zOu}$:

$$\widehat{zOy} = 45^\circ \text{ et } \widehat{zOu} = 40 + 45 = 85^\circ$$

EXERCICE 2

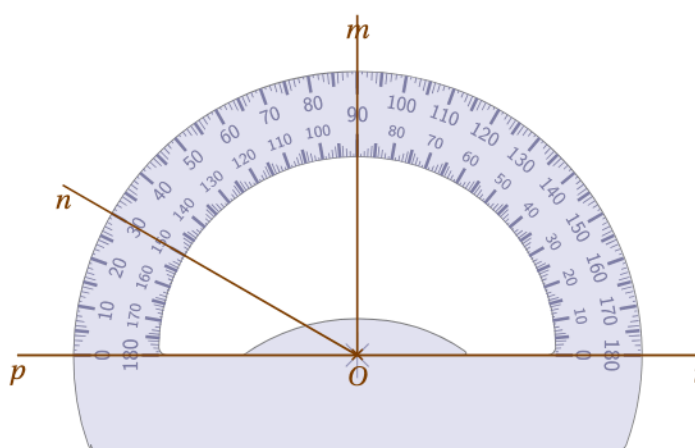

Calculer les angles $\widehat{xOw}$ et $\widehat{xOv}$:

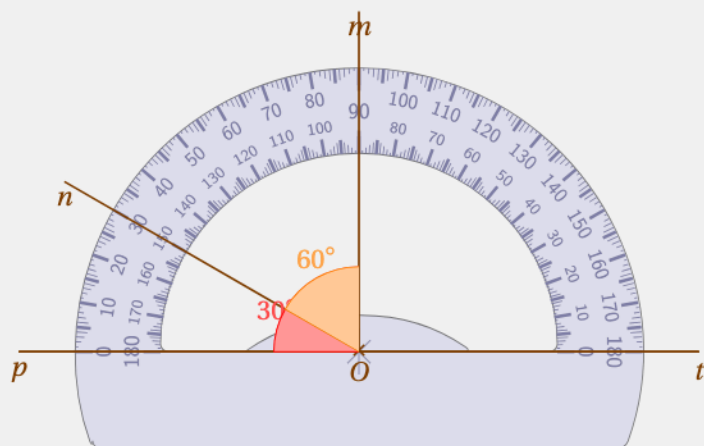

$\widehat{xOw} = 50^\circ$ et $\widehat{xOv} = 50 + 35 = 85^\circ$

EXERCICE 3

Calculer les angles $\widehat{mOn}$ et $\widehat{mOp}$:

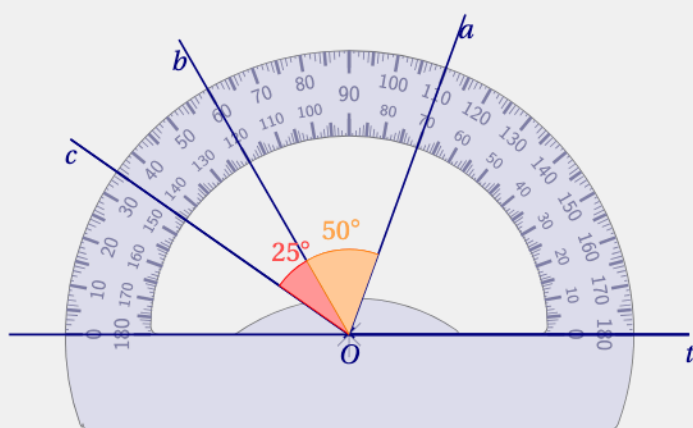

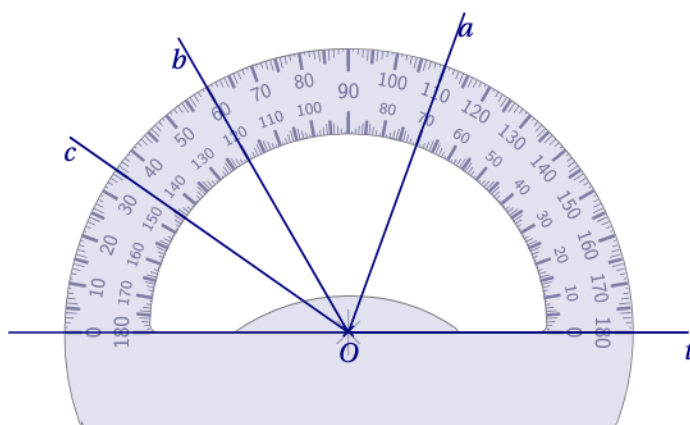

$$\widehat{mOn} = 60^\circ \text{ et } \widehat{mOp} = 60 + 30 = 90^\circ$$

EXERCICE 4

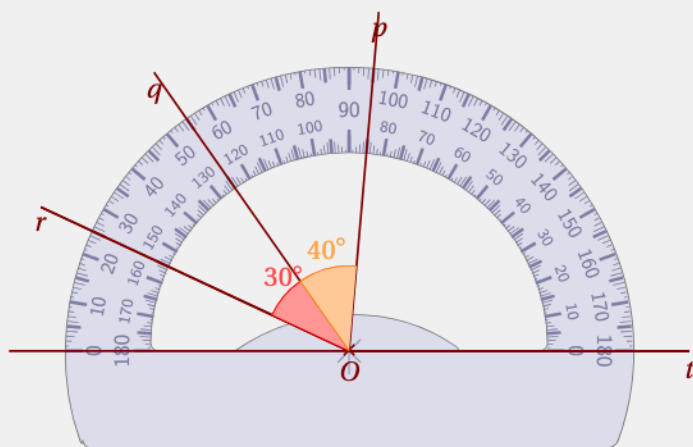

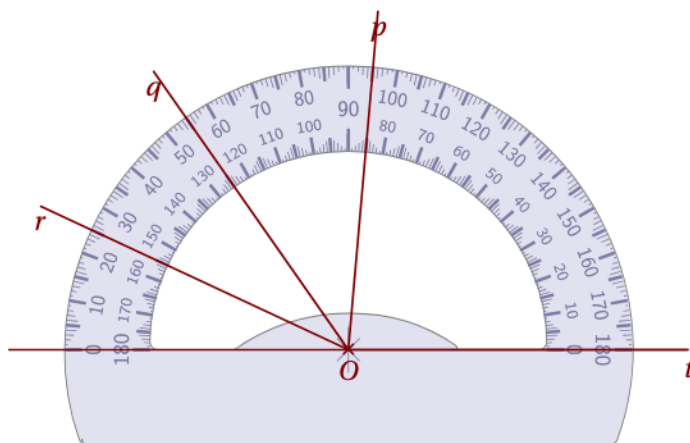

Calculer les angles $\widehat{aOb}$ et $\widehat{aOc}$:

$$\widehat{aOb} = 50^\circ \text{ et } \widehat{aOc} = 50 + 25 = 75^\circ$$

EXERCICE 5

Calculer les angles $\widehat{pOq}$ et $\widehat{pOr}$:

$$\widehat{pOq} = 40^\circ \text{ et } \widehat{pOr} = 40 + 30 = 70^\circ$$
